CHAPTER 1

INTRODUCTION

A right-of-way (ROW) is defined as "a type of facility located over, upon, or under federal lands that transport or convey some physical item or electronic message; or for the immediate storage of such a physical item."

Examples of activities requiring ROW Grants if using federal lands:

Transportation Systems	Generation, Transmission, Distribution, Reception Systems
Roads, Highways	Hydro-electric
Stock Driveways	Wind
Tunnels	Solar
Canals	Nuclear
Trails	Coal
Railroads	T.V.
Airways	Microwave
Tramways	Radio
	Telephone
	Telegram
	Other Electronic Systems
Pipelines	Water
Oil	Reservoirs
Natural Gas	Canals
Fuels	Ditches
Synthetic Liquids	Flumes
Slurry	Pipes
Storage Facilities	Pipelines
Conveyor belts	Tunnels

INTRODUCTION

BLM ROW Grants convey to the holder "a nonexclusive, nonpossessory right to construct, operate, and maintain" said facility.

Rights-of-Way (ROWs), as portrayed in this structured analysis, are the combination of five distinct types blended into one process. This document describes the current system for processing rights-of-way pursuant to the following sections of the 43 CFR (Code of Federal Regulations):

1. Mineral Leasing Act (MLA) of 1920 ROWs for Oil and Gas pipeline - CFR 2880;
2. Federal Land Policy and Management Act (FLPMA) of 1976, Title V, ROWs - CFR 2800;
3. Federal Aid to Highways - CFR 2807;
4. O & C Logging Roads - CFR 2812;
5. Wind Energy ROWs - CFR 2800.

Wind Energy ROWs are most distinct and require three separate primitive processes because no other type of ROW has the competitive bid process. This process is unique in ROWs as there is no guidance in any BLM Manual, and it is not covered in the CFR, although they are processed under FLPMA authority. The only existing guidance is found in policy statements issued by the California State Office. Procedures have been established by the Ridgecrest and Indio Resource Areas in the California Desert District.

Another unique ROW includes O & C Logging and Tram Roads. Although they are grouped under ROWs, the Oregon State Office considers them a forestry function. Personnel working on O & C ROWs code their time to the Forestry subactivity while processing cases. ROW "Holders" are termed "Permittees" in the O & C, and there may be reciprocal agreements between the Permittee and BLM.

The three remaining ROW types are not significantly different in the way they are processed.

This document is organized as follows: Chapter 1 - Introduction explaining the scope and structure of the document; Chapter 2 - Data Flow Diagrams (DFDs) illustrating the current method of processing for rights-of-way; Chapter 3 - Process List providing an alphabetical list of processes defined, their level, and the page references for each process in the DFDs and the input/process/output narratives if the process is at a primitive level; Chapter 4 - Input/Process/Output Narratives (IPOs) describing each process primitive in detail including definitions of steps taken or decisions made; and Chapter 5 - Data Dictionary and Cross Reference List defining all data flows appearing on the DFDs.

CHAPTER 2

DATA FLOW DIAGRAMS

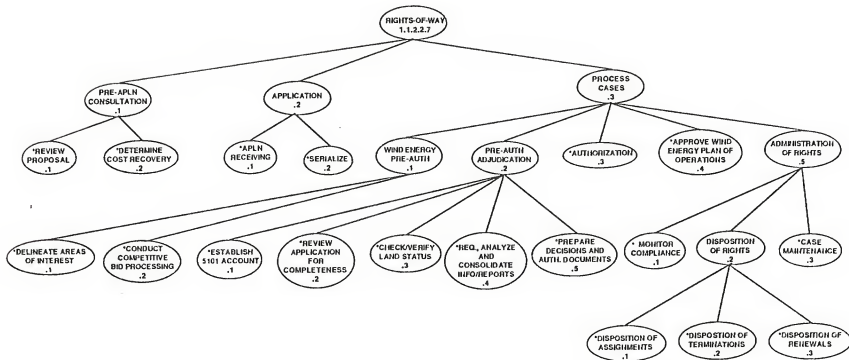

The current rights-of-way program is presented here as a series of data flow diagrams that show the sources and destinations of data, identify and name processes, identify and name data that connect sources and destinations of data, and describe data stores that are accessed. Each function may be broken down into a more detailed flow diagram. The hierarchical structure of each process is identified by decimalized identifiers.

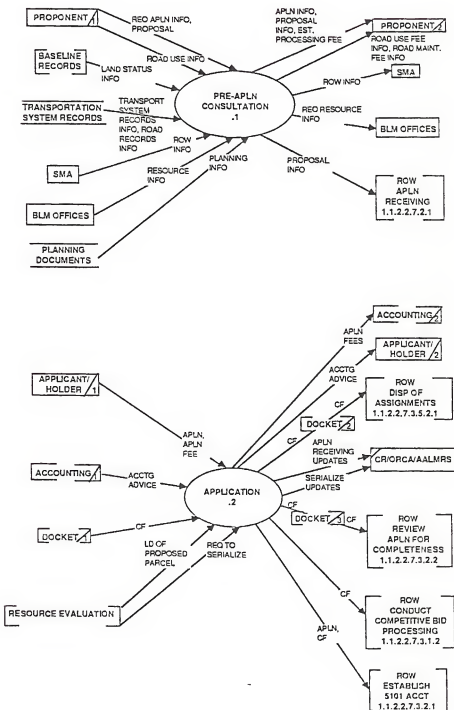

When it is no longer useful to decompose a process, the process and its logic are described by input/process/output narratives. This process is said to be at a primitive level.

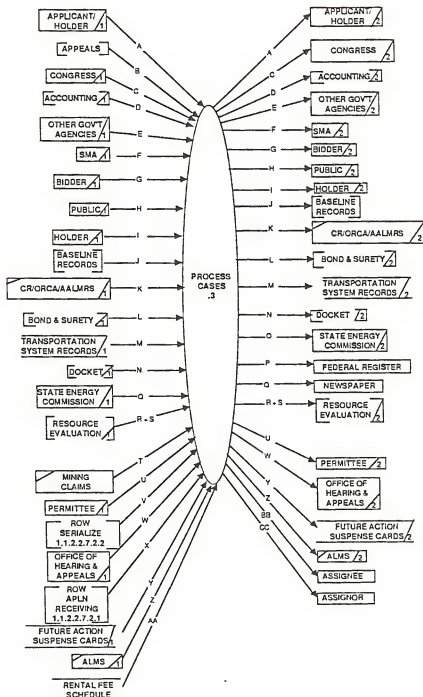

Standard representations on the DFDs are:

1. an ellipse is a process;
2. a rectangle is an external entity (generally outside of BLM control);
3. a set of brackets is an internal entity (generally thought of as an off-page connector or a pointer to a generic type of process);
4. a line is a data flow;
5. arrows at the ends of lines indicate the direction data is flowing;
6. two parallel lines are a data store (generally representing logical groupings of data rather than individual records or data components).

PROCESS LIST

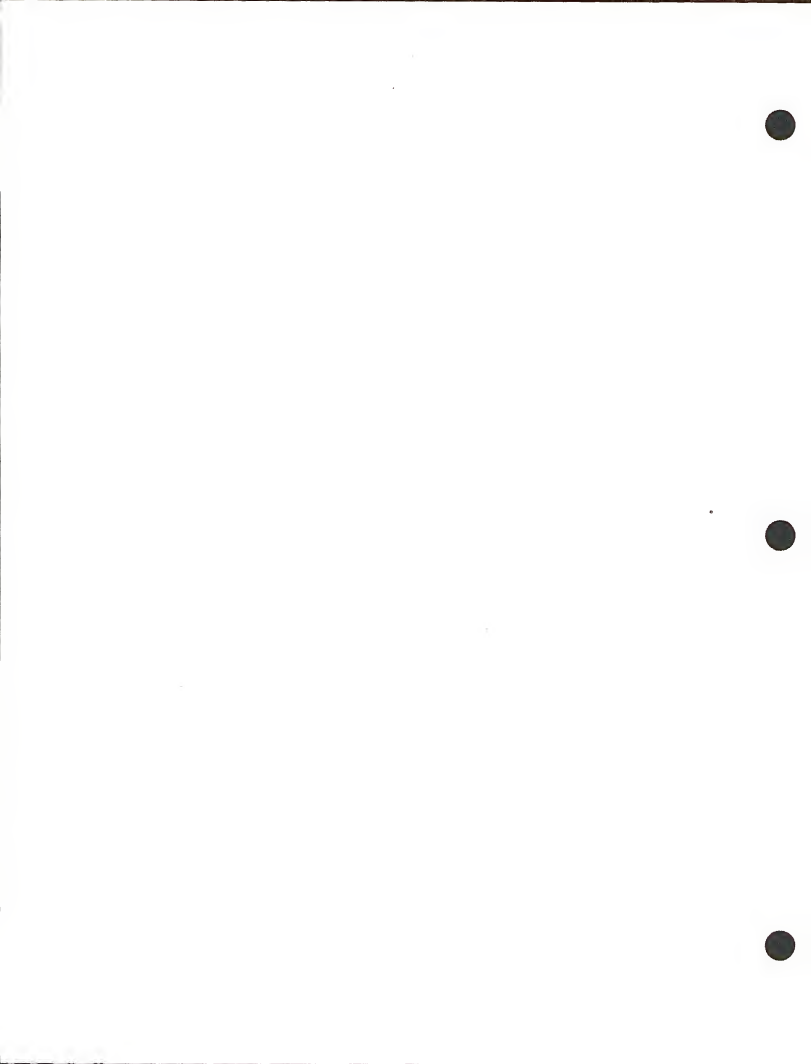

The following table lists all processes defined on the Data Flow Diagrams appearing in Chapter 2. The Chapter 2 page reference is next to each process. If the process is at a primitive level, i.e. functionally decomposed to a level at which no benefits are derived from further decomposition, a reference to the Chapter 4 narrative for that process is also listed.

CHAPTER 4

INPUT/PROCESS/OUTPUT NARRATIVES

The following narratives describe the detail processing done at the primitive level as defined by the Data Flow Diagrams. Included in each narrative is the following information:

1. the process name;
2. the identifier or process number;
3. the parent process name (the parent's identifier can be derived by omitting the last digit of the process identifier);
4. a general description of the process;
5. any applicable policies and procedures;
6. any constraints that may affect processing; and
7. the input/process/output narrative.

The process narratives appear in the order they are defined in the Data Flow Diagrams in Chapter 2.

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Review Proposal

Identifier: 1.1.2.2.7.1.1

Parent Process Name: Pre-Apln Consultation

Description: Identify for the Proponent the Right-of-Way filing requirements and qualifications as well as identify the work involved in processing the proposed action.

Policies/Procedures: BLM Manual 2802.12 on Proposal Information

Constraints: None.

Input	Process	Output
Request Application Info	Receive and review Request Application Information from proponent. Determine what information is needed. Prepare response, which normally includes the application, request for Plan of Development, ROW pamphlet, standard strips for the type of right-of-way needed by the proponent. Provide Application Information to proponent.	Application Information
Proposal	Receive and review Proposal from the proponent. Proposal may be formal or informal. This process may be very short (a few minutes) or require several weeks to complete depending on the complexity of the proposal. The proposal normally includes a variety of data (location, project description, transportation systems maps, road records information, etc.).	

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
Land Status Info Transportation System Records Info Road Records Info	Check Land Status info from the plats, Transportation System Records Info, and Road Records Info to determine if the proposal action is on federal lands. Also determine if there are restrictions that may apply due to land status, e.g., Withdrawals, Wilderness Study Area, Areas of Critical Environmental Concern.	
	If not federal land or if use is precluded due to land status restrictions, inform Proponent either to change the proposal or drop the proposal altogether.	Proposal Information
	If federal land is administered by another Surface Management Agency (SMA) and their input is needed, inform SMA of the proposal by sending any pertinent ROW information or giving them the ROW information at a meeting if one is planned with the Proponent to discuss the proposal.	ROW Information
→ ROW Information	Receive ROW Information from the SMA.	
	If resource information is needed, may ask for Request Resource Information from BLM Units as to the possible impacts of the proposal action and how detailed the analysis would need to be.	Request Resource Information
Resource Information	Receive Resource Information from BLM Units.	
Planning Information	Review Planning Information from Planning Documents to determine if the proposed action is in conformance with planning.	

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
	Determine from the information gathered the complexity of the project. Identify any possible problem areas (i.e., planning conflicts) that are discernible so that the Proponent can adjust the proposal prior to filing an application. Send Proposal Information to proponent.	Proposal Information
Road Use Information	For O&C lands, receive proponent's estimate of road use. Advise the proponent of road use fees and maintenance fees (based on published statewide or local fees), requirements of bonding, and insurance requirements, if any.	Road Use Fees Information Road Maintenance Fees Information
	Road use information may also pertain to a potential Reciprocal Rights Agreement.	
	May create a temporary working file which will become part of the official application file.	
	Send O&C proposal info to "ApIn Receiving."	Proposal Information
	For all other ROWs, send Proposal Information to "Determine Cost Recovery."	Proposal Information

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Determine Cost Recovery

Identifier: 1.1.2.2.7.1.2

Parent Process Name: Pre-ApIn Consultation

Description: Determine if cost recovery is required. If cost recovery is required, determine estimated application processing and grant monitoring costs for the Proponent.

Policies/Procedures: For Cost Recovery: 43 CFR 2883.1-1a(2) for MLA, 2881.1a(3)

43 CFR 2803.1-1A(2) for FLPMA

Input	Process	Output
Proposal Information	Receive Proposal Information from "Review Proposal." Determine if the proposal is subject to cost recovery, and make cost recovery determination in accordance with current CFR. Notify proponent of cost with the Estimated Processing Fee.	Estimated Processing Fee

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Application Receiving

Identifier: 1.1.2.2.7.2.1

Parent Process Name: Application

Description: Receive materials and determine if materials are a new application requiring serialization, or an amended/renewal application, or information relating to an existing case.

Policies/Procedures: None.

Constraints: None.

Input	Process	Output
Application Application Fees	<p>Receive Application and Application Fees from applicant/holder and determine proper authority. Application used in this process could include the application form, further project descriptions, proof of licensing, maps, plats, signature on application, proposed amendment, assignment, temporary use permit, bonding, etc.</p> <p>Date stamp the application.</p> <p>Determine if a new application or related to an existing one.</p> <p>If a new application, send Application and Application Fees to "Serialize."</p>	<p>Application Application Fees</p>

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
	If existing case, send Application Fees to Accounting (these fees are related to an assignment or a proposed amendment).	Application Fees
Accounting Advice	Receive Accounting Advice from Accounting.	
Case File	Receive Case File from Docket for assignment and amendment cases. File Application and Accounting Advice in Case File. If an Assignment, send Case File to "Disposition of Assignments" process.	Case File
	If an amendment, send Case File to "Review for Application Completeness" process.	Case File
	Update Case Recordation/ORCA with Application Receiving Update.	Application Receiving Update

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Serialize

Identifier: 1.1.2.2.7.2.2

Parent Process Name: Application

Description: To give an application a specific serial number which will allow for tracking of the case at any given point.

Policies/Procedures: None.

Constraints: None.

Input	Process	Output
Application	Receive Application and Application	
Application Fees	Fees from "Application Receiving."	
Request to Serialize	For Competitive Wind Energy, receive	
LD of Proposed	Request to Serialize and Legal	
Parcel	Descriptions of Proposed Parcel	
	from Land Report Analysis	
	("Management Decision").	
	If under O&C Authority, O&C Logging	
	Road ROWs are not formally	
	serialized into the statewide	
	system or updated in Case	
	Recordation/ORCA. Assign District	
	ROW number from District ROW Number	
	Log and stamp application. Build

	For all other ROWs, assign the next	
	available Serial Number from the	
	Serial Number Log and stamp	
	application. Build Case File.	
	If there are Application Fees, send	
	to Accounting.	Application Fees

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
Accounting Advice	<p>Receive Accounting Advice from Accounting and file in Case File.</p> <p>Update Case Recordation/ORCA. At this point, a new case is entered into the system as the Serialized Update(s).</p> <p>If Wind Energy, send Case File to "Conduct Competitive Bid Processing."</p> <p>If there is a need to establish a 5101 Account, send Case File and Application to "Establish 5101 Account."</p> <p>Send Case File to "Review for Application Completeness."</p>	<p>Serialize Update(s)</p> <p>Case File</p> <p>Case File Application</p> <p>Case File</p>

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Delineate Areas of Interest

Identifier: 1.1.2.2.7.3.1.1

Parent Process Name: Wind Energy Pre-Auth.

Description: To identify parcels of land that may be offered for Competitive Wind Energy Rights-of-Way.

Policies/Procedures: None.

Constraints: None.

Input	Process	Output
Public Interest	If the public shows sufficient interest in Wind Energy development to consider offering parcels for development, send to the public a Request for Land Description.	Request Land Description
Land Status Info	Check Land Status Info from the plats and determine the ownership of parcels identified. Send Request for Land Description to the State Energy Commission to determine what areas have been identified as having a sufficient wind resource to warrant development.	Request Land Description
Land Description	Receive Land Description from public and State Energy Commission. Review Land Description received from public. Compare to Land Description identified by the State Energy Commission. Those land descriptions identified by the public, but not by the State Energy Commission, may be further evaluated through the NEPA process. Send Land Description of proposed parcels to Resource Evaluation.	Land Description

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Conduct Competitive Bid Processing

| Identifier: 1.1.2.2.7.3.2.2

Parent Process Name: Wind Energy Pre-Auth.

Description: To conduct competitive bid processing to sell the offered parcel to successful bidder.

Policies/Procedures: None.

Constraints: None.

Input	Process	Output
Case File	Receive Case File from "Serialize."	
Bid Bid Deposit	Receive Bid and Bid Deposit from bidder. Send Bid Deposit to Accounting.	Bid Deposit
Accounting Advice	Receive Accounting Advice from Accounting. Add to Case Files.	
	Determine apparent high bidder. Send High Bid Information and Case File to "Review for Application Completeness" to verify high bidder's qualifications to hold right-of-way.	High Bid Information Case File
Disqualified Bidder Information Case File	If the apparent high bidder is disqualified, receive Disqualified Bidder Information and Case File from "Review Application for Completeness."	

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
Verification of Successful Bid Case File	Issue Disqualified Bidder Notice to bidder and send next High Bid Information to "Review Application for Completeness" to verify qualifications. This process is repeated until a successful bidder is determined.	Disqualified Bidder Notices Case File
		High Bid Information
	Receive Verification of Successful Bid and Case File from "Review Application for Completeness." Send Successful Bidder Notice to all bidders.	Successful Bidder Notice
Application	Send Request Application to successful bidder.	Request Application
	Receive Application from successful bidder and send Application and Case File to "Establish 5101 Account."	Case File Application
	Send Bid Deposit Refund Notice to Accounting for refund of the unsuccessful bidder's bid deposit.	Bid Deposit Refund Notice

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Establish 5101 Account
 Identifier: 1.1.2.2.7.3.2.1
 Parent Process Name: Pre-Auth Adjudication
 Description: This process identifies the steps required to establish and maintain a 5101 Account.
 Policies/Procedures: None.
 Constraints: None.

Input	Process	Output
	If, during the Proposal Review and Cost Recovery Determination Process, it was determined that the right-of-way would cost \$5,000 or more to process, it will be necessary to establish a 5101 Account. These rights-of-way will require full cost reimbursement from the Holder.	
Case File Application Letter of Intent	Receive Application and Case File from "Serialize." This process is initiated upon receipt of the Application and Case File or upon receiving a Letter of Intent to file an application from a proponent.	
	A Request to Establish a 5101 Account is sent to Accounting in the State Office. The money needed may be requested and received either before or after the account is established. The amount of money which is required is determined by estimating the workmonths and support services cost to process the application and monitor the grant.	Request to Establish 5101 Account

INPUT/PROCESS/OUTPUT NARRATIVES

Input	Process	Output
Project Number	<p>Receive Project Number from Accounting. Accounting will assign a project number, which is used for coding and tracking costs.</p> <p>Prepare and send a Notice of First Quarter Deposit Required to the applicant/holder.</p> <p>Send Case File with application to "Prepare Decision and Authorization Document" process for Competitive Wind Energy or to "Review Application for Completeness" process for all other ROWs.</p>	<p>Notice of First Quarter Deposit Required</p> <p>Case File</p>
5101 Account Report	<p>On a quarterly basis, a 5101 Account Report is received from Accounting. There is a determination made as to the need for additional funds to continue the account. When required, a Notice of Subsequent Payment Due is sent to the Applicant/Holder.</p> <p>This process is ongoing until construction is completed or for the term of the authorization document on Wind Energy ROW.</p>	<p>Notice of Subsequent Payment Due</p>

INPUT/PROCESS/OUTPUT NARRATIVES

Process Name: Review Application for Completeness

Identifier: 1.1.2.2.7.3.2.2

Parent Process Name: Pre-Auth Adjudication

Description: Determine if the application has the necessary information to facilitate processing, and identify information that the applicant or other entities may need to supply the Bureau.

Policies/Procedures: None.

Constraints: None.

Input	Process	Output
Case File	Receive Case File from "Serialize," "Establish 5101 Account," or "Application Receiving."	
High Bid Information	Receive High Bid Information from "Conduct Competitive Bid Processing."	
	Review application. In order for the application to be complete, it must contain the following information:	
	1. Full name and address of applicant.	
	2. The maps and/or drawings which portray the physical location of the proposed right-of-way--that these documents are legible and identify the location of the route or site. For O&C a road system diagram must also be included.

Input	Process	Output
	<ol style="list-style-type: none"> 3. The description of the proposed right-of-way can be used in the grant preparation and describes the size or capacity of the facility (such as the diameter of the pipeline, voltage transmitted by the powerline, width of right-of-way requested). 4. Statement of applicant's technical and financial ability to construct, operate, maintain, and terminate the proposed right-of-way. 5. Certification of legal age of the applicant or that the entity is authorized to do business in the state where the proposed right-of-way is located. 6. For MLA ROWS, information regarding the applicant's citizenship or the entity's legal qualifications is attached to the application or or referred to if filed in an earlier application. 7. Application fees. <p>If application is complete and the applicant or bidder (Competitive Wind Energy) is qualified:</p> <p>For Competitive Wind Energy: send Case File and Verification of Successful Bid to "Conduct Competitive Bid Process."</p>	<p>Case File Verification of Successful Bid</p>

CHAPTER 5

DATA DICTIONARY AND CROSS REFERENCE LIST

The data dictionary lists all data flows defined on the DFDs in alphabetic order by name. The information included for each entry in the dictionary includes:

1. data name;
2. mnemonic or abbreviation, as necessary;
3. description of uses and characteristics;
4. data type (i.e. set, record, data aggregate, element);
5. security considerations for both retrieval and update; and
6. definition (used primarily for composite data).

The cross reference list at the end of the chapter lists those data dictionary entries that have mnemonics or abbreviations with their actual name. This list may be used to quickly find a data flow in the dictionary when it is referenced on the DFD only by its mnemonic.
